Daniel Zulato Dias de Moraes

LinkedIn https://www.linkedin.com/in/daniel-zulato-dias-moraes/

Summary

Seasoned Software Engineer and IT Professional with over 12 years of experience, including a decade dedicated to software development.

I transitioned from a specialized role in embedded automotive test automation (HIL rigs) back to core IT Platform Software Engineering and Automation.

I offer a unique multidisciplinary background, especially in networking, embedded systems communication, with cybersecurity awareness.

With a core passion for SRE, IoT, and Web Services, I advocate for technical excellence through robust documentation and streamlined processes.

Competence Overview

- **Programming & Scripting**

Python, Go, C/C++, JavaScript, Bash/Shell. Experience with Java, C#, and legacy stacks.

Experienced with data structures, algorithms, and design patterns.

- **Cloud & Infrastructure**

AWS (primary), Hetzner, Proxmox. Experience with GCP and Azure.

Comfortable with cloud systems architecting and system design.

- **DevOps, Delivery & Orchestration**

Terraform/OpenTofu, Ansible, Docker, Kubernetes, Helm, HashiCorp Vault.

- **Continuous Integration & Delivery (CI/CD)**

GitLab CI, Buildkite, AWS Cloud Deploy. Experience with Jenkins, Buddy CI, and internal systems.

- **Observability**

Prometheus, Grafana, Datadog, AWS CloudWatch.

- **Databases**

PostgreSQL (including Timescale), MySQL. Experience with SQL Server, InfluxDB, MongoDB.

- **Embedded & Automotive**

Yocto build system, Buildroot, ISO-26262 , microcontroller development (AVR/PIC) and TI, experience with Vector tools (CANoe, RT-Rack).

- **Protocols**

MQTT, CoAP, Protocol buffers, CAN, UART, I2C, TCP/UDP, SNMP (experience).

- **Tools and AI assisted development**

Git, Gerrit, SonarQube, Mend, White source, Claude Code, Mistral Code and OpenCode with local with models deployed locally (mostly for learning laboratories and PoCs).

Latest Professional Experience

Senior Software Engineer – Contract – Wittra Networks AB
August 2026 – November 2026 | Stockholm, Sweden | On-Site

Main accomplishments:

- Architected and documented the project for the OPC-UA as Microservice.
- Elaborated ADRs, documented standards to be followed according to OPC-UA Foundation.
- Prototyped a functional OPC-UA Protocol Translator microservice in Node RED.
- Created documentation for standard ways of creating microservices.

Platform Engineer – BL!XT Tech AB
September 2024 – August 2026 | Stockholm, Sweden | On-Site

Main accomplishments:

- Architected and delivered the product platform from prototype to production-ready deployment
- Hardened security for field sensors and controls with end-to-end encryption
- Engineered high-performance protocol translators in Go and Protocol Buffers
- Automated platform deployment and edge computer provisioning to enable scaling up
- Conceptualized and built a low latency/close to real-time device orchestration system

Software Engineer – Volvo Cars Corp. | ALTEN Consulting Services
May 2023 – September 2024 | Gothenburg, Sweden | Hybrid

Main accomplishments:

- Maintained Firmware Update Tool — improved delivery pipeline used across multiple teams
- Developed test tools and plugins for validation workflows and reduced manual testing effort
- Optimized tests for software on HIL rigs, ensuring consistent, reproducible environments
- Led integration of new hardware test implementations on HIL rigs

Test Automation Engineer – Volvo Cars Corp. | ALTEN Consulting Services
Jun 2022 – May 2023 | Gothenburg, Sweden | On-Site

Main accomplishments:

- Analyzed requirements and test specifications to define clear, testable acceptance criteria for automotive embedded systems
- Performed risk assessment of requirements to comply with ISO26262 spec
- Designed and implemented automated tests using a mix of in-house tools, Vector, and Kvaser
- Troubleshot automation workflows in test execution on embedded devices
- Supported split tests (A/B testing) with log and evidence collection
- Worked within Scrum and SAFe, participating in Pre-PI and PI Planning

Previous Professional Experience

Senior Site Reliability Engineer (SRE) – Trimble Transportation

Jun 2021 – May 2022 | São Paulo, Brazil | Remote
Senior DevOps/SRE Engineer working with the TTM United States team dedicated to FedEx Ground.

- Maintained and Developed Software Delivery System
- Implemented new infrastructure and cost reduction projects
- Participated in the implementation of code review tools such as SonarQube and Mend
- Constantly produced documentation and runbooks on Confluence

Analyst Site Reliability Engineer (SRE) – Smart MEI
Nov 2020 – Jun 2021 | São Paulo, Brazil | Hybrid

- Implemented pipelines
- Supported main SRE and Software Engineering Team
- Supported Anti-Fraud and Implementing Central Bank Audition tools

Team Leader Issue Tracking – Smart MEI
May 2020 – Dec 2020 | São Paulo, Brazil | On-Site

- Coordinated a small team of software developers
- Supported platform with incident handling and response

Analyst Issue Tracking – Smart MEI
Oct 2019 – May 2020 | São Paulo, Brazil | On-Site

- Handled small to medium scale incidents
- Developed internal tools and generated operational reports.

Embedded Systems Developer as Contractor | Splice do Brasil Telecom S/A
Feb 2019 – Aug 2019 | Sorocaba, Brazil | On-Site

- Development of Embedded Software in Go and C++
- Co-developed image streaming sub-system in Go implementing open-source codecs
- Executed Field Test Validations and Evidence Collection

Early Career (2010–2018)

- IT support, network administration, and embedded development roles across Fox & Earth GmbH, Anglo School, and Star Computer.
- Experience with SCADA systems, microcontroller development (AVR/PIC), and internal tooling.
- Completed military service as a driver (Private rank) in an Anti-Aircraft Unit.

Education, Training & Qualifications

Automotive Functional Safety Course – Volvo Cars Corp.
Nov 2022

Digital Industrial Automation Technician Training – SENAI
Aug 2018

Analog Industrial Automation Technician Training – SENAI
Jul 2018

Microchip Embedded System Congress 2018
Sep 2018

Microchip Embedded System Congress 2017
Sep 2017

B.Sc. in Information Technology Management
Faculdade de Tecnologia da Cidade de São Paulo - FATEC
Jul 2014 – Nov 2017

Certified Building Electrician – SENAI
Jul 2008

Personal Information

Nationality: Brazilian | Age: 37

Personal Qualities

- Naturally curious
- Documentation-driven
- Detail-oriented
- Process-oriented
- Enjoys hardware exploration and system internals

Interests and Hobbies

Electronics, embedded systems, IoT projects, applied cybersecurity, fitness, running, and technical and leisure reading

Driver's License

- Swedish AM, B
- Brazilian A, B

Languages

Ordered in level of fluency

- Portuguese
- English
- Italian
- French
- German
- Swedish
